SEM Lab Meeting week 6

Date: 16th December 2021

Main focus: Assignment 1, implementation of must haves and design patterns

Chair: Keshav

Secretary: Natalia

Agenda

- Progress we have made this week:
    - Completed implementation of design patterns and consequent testing
    - Documents for task 2
    - Security implemented
- Discussion points:
    - Assignment 1, task 2
- Plan for next week: Start implementing the should have features
- Questions:
    - If 1 group member wants to do more work during the holiday will that affect the grades of others due to the imbalance in code contribution.

Meeting Notes

- Merge to main on Wednesday morning to see it in git inspector on Thursday.

- Docs - Architecture
    - databases - make a separate db for each microservice
    - Change to db symbol

- Docs - Design Patterns
    - Length ok, diagrams ok, code ok
    - Don't need to explain the code
    - Make sure that the discussion about why the design pattern is useful is incorporated
    - Idea: switch groups and make sure you understand
- We can still make changes in our sprint reviews, but ours are ok
- Work on merge reviews
